You said...

Who are the key roles and organisations in homes and health....

*Local Authority

Public Health, Environmental Health, Housing Services, Regulatory Services, Spatial Planning, Building Control, Energy teams, Benefits, Children/adult Social Care, Analysts, Policy, Sustainability units

Who

- Local Authorities/depts*
- NHS
- Registered Social Landlords
- General Practitioners
- Clinical Commissioning Groups
- Integrated Care Systems
- Government Departments
- Evidence/data providers
- Utilities
- Private Rented Landlords
- Voluntary Community Sector – non profit
- Hospitals
- Mayors/combined authorities
- Emergency Services
- Citizens advice
- Elected members/Councillors
- Communities
- Developers, Builders, Home maintenance Engineers
- The Public
- Media
- Estate/Letting Agents

Roles

- Individual, community, local, regional, national place levels
- Coordinated, clear, strategic approach at all levels – holistic - systems
- Networks of expertise for collaboration
- Ensure common language and terminology
- Roles to support provision of good homes
- Access to safe and secure housing
- Grant funding
- Ensuring access to green and blue spaces around homes
- Access to transport infrastructure links
- Ensuring suitable design inside and outside of homes
- Reducing areas of deprivation and inequality
- Upholding the standards/regulations
- Raising awareness – health improvement
- Making every contact count (MECC)
- Prioritising homes as a wider determinant of health

Challenges and barriers

- Existing housing stock
- Design
- Finance, funding costs
- Silo working
- Urban/rural/coastal needs
- Poverty and deprivation
- Policy and strategy not holistic/fit for purpose
- Differing home ownership, renting, transient tenures and homelessness needs
- Not enough supported guidance/legislation
- Communication/messaging gap for communities
- Economic climate and rising energy costs
- Limited trusted skilled trades
- Housing supply and demand
- Lacking retrofit, adaptation and improvements plan
- Lack of homes links with transport and communities for healthier places
- Health in homes seen as 'additional' rather than integrated
- Complex geographies, lack of granular data
- Impact of Covid-19 and shift in strategy e.g. more time at home, homeworking, neighbourhoods
- Available time and resource

Mapping the key themes in the system

**Yorkshire and Humber Public
Health Network

- Opportunities and interventions
- key node
- null

Reflections

- **Coproduction and sharing:** partners and colleagues across the system
- **Evidence:** not one size fits all, but it is important
- **Search for opportunities and levers for change-** this demands a good knowledge of the system, so needs involvement from colleagues and partners.
- **Important that all parties see the benefits,** not just us
- **It's not about taking over the remits of others,** but we need to create a common understanding of health equity and the health impacts of what we do.
- **Health, inequalities and sustainability** rather than just health, ask the question- how will this reduce health (or any) inequalities and increase sustainability?
- **Where does the power lie-** do we have the authority or just the expertise? Influence and power jointly across the system
- **Long-term thinking and vision-** generation

- Next steps
 - Review and develop the maps and sense check with partners and speakers
 - Create a summary map with key issues and opportunities
 - Develop a useful resource based on everyone's feedback

Homes and Health Webinars Working Group

- Yorkshire and Humber Public Health Network/Association of Directors of Public health
- Planning Healthy Places Community of Improvement (YH)
