

UKPHR Registration Standards Public Health Practitioners

(for all applicants starting portfolio on or after 1st July 2026)

July 2026

Public Health Practitioner Standards 2026

Applicants are required to demonstrate their knowledge, understanding and application of ALL the standards.

Applicants must submit at least THREE written commentaries on different aspects of their own area of work that in total demonstrate all the standards. In addition to the commentaries applicants must submit evidence that demonstrates achievement of the standards. Evidence must be appropriate to each specific standard.

At least 50% of the work described in the commentaries and of the evidence submitted must be no more than 5 years old.

The standards refer to the area of work you are engaged with as a Practitioner. Where the standards use the phrase 'Public Health Function' they are referring to p10 of the Public Health Skills and Knowledge Framework 2016, which describes this as: 'improves and protects the public's health and reduces health inequalities between individuals, groups and communities, through co-ordinated system-wide action'.

1

Practising professionally, ethically and legally.

- 1.1 Comply with statutory legislation and practice requirements in your area of work.
- 1.2 Use an ethical approach in your area of work, identifying ethical dilemmas or issues arising and how you address them.
- 1.3 Act in ways that promote equality and diversity.
- 1.4 Act in ways that recognise people's expressed beliefs and preferences and value them as individuals
- 1.5 Demonstrate how you manage resources in your public health activities ensuring they are used exclusively for their designated purposes.
- 1.6 Act within the limits of your professional competence, seeking advice when needed.
- 1.7 Continually keep your professional knowledge and skills up to date, demonstrating how you systematically reflect upon these, and identify where you could make improvements to further develop your own practice.
- 1.8 Contribute to the development and improvement of others' public health practice.

2

Using public health information to influence population health and wellbeing.

- 2.1 Identify data and information requirements to deliver the public health function demonstrating use of epidemiological terms and concepts.
- 2.2 Manage data and information in compliance with policy and protocol, demonstrating awareness of data confidentiality and disclosure.
- 2.3 Obtain, verify organise and present data and information, showing awareness of potential data anomalies.
- 2.4 Demonstrate how health inequalities are identified and monitored.
- 2.5 Interpret and present information using appropriate analytical methods for quantitative data.
- 2.6 Interpret and present information using appropriate analytical methods for qualitative data.

3

Assessing the evidence for public health interventions and services.

- 3.1 Access and appraise appropriate evidence of effectiveness for public health interventions or services.
- 3.2 Apply evidence to plan the delivery of effective public health interventions or services.

4

Protecting the public from health risks while addressing differences in risk exposure and outcomes.

- 4.1 Demonstrate how risks to health and wellbeing and health protection are identified, prevented or controlled.
- 4.2 Demonstrate how individual and population health differ, and describe the possible tensions which may arise when promoting health and wellbeing.

5

Implementing public health policy and strategy.

- 5.1 Support the implementation of policies or strategies to improve health and wellbeing and reduce health inequalities.
- 5.2 Demonstrate how your work is influenced by an understanding of the impact of the wider determinants of health.
- 5.3 Critically reflect on and make suggestions for how public health policies or strategies could be improved.

6

Collaborating across organisations and boundaries to deliver the public health function.

- 6.1 Show how you work in partnerships or with multi agency teams to deliver the public health function.
- 6.2 Demonstrate how you work collaboratively with other teams or organisations to improve public health reflecting on your personal impact on these relationships.

7

Planning, implementing and evaluating public health programmes and projects.

- 7.1 Describe how you have planned a public health intervention to improve health and wellbeing, demonstrating terms and concepts used to promote health and wellbeing.
- 7.2 Demonstrate how the culture and experience of the target population may impact on their perceptions and expectations of health and wellbeing.
- 7.3 Show how the target population were involved in intervention planning, delivery or co production and have been supported to make informed decisions about improving their health and wellbeing.
- 7.4 Evaluate a public health intervention, reporting on its effect and making suggestions for improvement.
- 7.5 Demonstrate project management skills in planning or implementing a public health intervention.
- 7.6 Demonstrate how quality assurance principles or policies are applied when planning or implementing a public health intervention.
- 7.7 Demonstrate how risk management principles or policies are applied when planning or implementing a public health intervention.

8

Communicating with others to improve health outcomes and reduce health inequalities.

- 8.1 Communicate public health information clearly to a variety of audiences.
- 8.2 Communicate the health concerns and interests of your target population to influence service provision.
- 8.3 Demonstrate awareness of the effect the media can have on public perception of health and wellbeing.
